

Complex TV Wordpress Plugin Instructions

What is the purpose of this plugin?

Videos that are embedded from the Complex Media Video Hub use a Javascript tag to display the video. Depending on your settings, WP might strip off those Javascript tags for security reasons. The Complex TV plugin lets you use a custom shortcode instead, making it easier to embed videos from the hub.

Installation and Setup

1. Download and install the Complex TV plugin from here <http://wordpress.org/plugins/complex-tv-embed/>
2. Activate the plugin

3. Enter your default settings (not required). Click on the Settings tab (on the left navigation menu) and select Complex TV Embed from the dropdown.
 - a. **Site Name:** your site name, all lowercase, no spaces or special characters. For example: complextv
 - b. **Player ID:** your unique player id
 - c. **AdSet ID:** your unique adset id
 - d. **Width:** default player width. For example: 640
 - e. **Height:** default player height. For example: 480

If you're not sure what values to enter, look at the following standard embed code example (copied from the video hub):

```
<script
src="http://cdn1.complex.com/tv/js/complexEmbed.min.js"></script><script
src="http://player.ooyala.com/v3/55a7bf6ee10a4adfb727d1ecbcd7edc"></scrip
t><div id="ooyalaplayerQwZDFjbTq0dCb5bIZzK-QNwOfBnh_dA3"
style="width:640px;height:360px;"></div><script>ComplexEmbed.Application.i
nitialize({cId: "QwZDFjbTq0dCb5bIZzK-QNwOfBnh_dA3",adSetCode:
"9f0ba3d5d8914b8785852c16960b7d54",site: "complextv",kw:
""});</script><noscript><div>Please enable Javascript to watch this
video</div></noscript>
```

The first highlighted number is your custom player id, the adSetCode is your AdSet ID, and the site is your SiteName.
