

Like Gate Documentation

What is Like Gate

Like Gate allows you to reveal some hidden/secret content when the user likes a piece of content. Therefore increasing the likeness of your articles. The likes will appear on your user's Facebook status wall/timeline which can be seen by their friends.

There are 2 versions of the plugin

- Lite (Free) - <http://wordpress.org/extend/plugins/like-gate/> from WordPress.org
- Pro (Paid) - <http://club.orbisius.com/products/>

How it works

1. You to install the plugin (lite or pro)
 - a. For Lite: search for **like gate** within WordPress' (Plugins > Add New)
 - b. For Pro: visit the site mentioned above and download the ZIP file
2. Then you need to edit existing or add a new post/page
3. Surround the hidden content with like-gate shortcodes
4. Visit the page to see if the like button will show on the page

Note: You can read more on shortcodes on this site:

http://codex.wordpress.org/Shortcode_API

Like Gate Lite Options

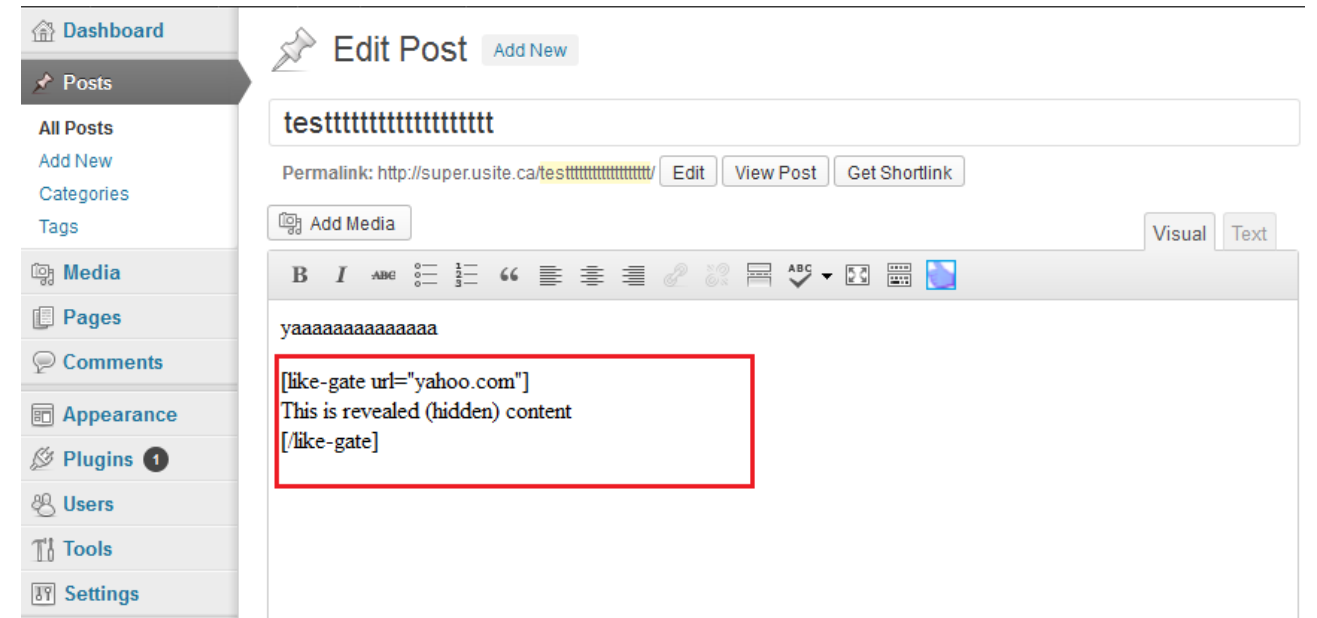

This will generate the Like button for the current post or page. Works in both Like Gate and Like Gate Pro.

```
[like-gate][like-gate]
```

Like Gate Pro Options

Like Gate Pro - send likes to a site/fan page of their choice not just a blog post.

```
[like-gate url="yahoo.com"][/like-gate]
```

Like Gate Pro allows you to include other shortcodes within the like-gate shortcodes.

```
[like-gate]
  [another-short-code]
  .....
[/another-short-code]
[/like-gate]
```

Sometimes after people like your piece of content Facebook will show a comment box which can obstruct the view of the hidden content. To hide the comment box insert "hide_comment="1" parameter.

```
[like-gate hide_comment="1"]  
[/like-gate]
```

Installation Steps

- Log into WordPress Administration (yourdomain.com/wp-login.php)
- Go to Plugins > Add New

- Click on Upload, Select the .ZIP file that you've downloaded and click on upload
- Activate the plugin
