

# Social Payments | WordPress Plugin

version 1.2

Lots of plugins and scripts allow you to implement **Pay with a Like**, or **Pay with a Tweet**, but some of them are not flexible and they do not allow for total customization. Small code modifications allow the user to edit everything inside.

For a WordPress site, though, you need dynamic content and you need to be able to display the social payment module just by adding a simple shortcode.

The **Social Payments** plugin for WordPress allows customization of Facebook page, Google+ page, Twitter text, link and hashtags details. It also uses HTML5 version of all social scripts and very clean source code for theme compatibility.

Visit the **Settings -> Social Payments** section, select your desired social services and fill in your page details.

## Social Payments

About Social Payments ([official web site](#))

You are using Social Payments plugin version 1.1.  
Dependencies: [Font Awesome](#) 4.0.3.

Save Changes

### Available Shortcode Samples

This shortcode displays the three social buttons:  
`[social-sell]Your content here[/social-sell]`  
Add any content you want inside the shortcode, images, text, links, videos, downloads and more.

## Usage

This shortcode displays the three social buttons:

**[social-sell]**Your content here**[/social-sell]**

Add any content you want inside the shortcode, images, text, links, videos, downloads and more.

## Features

- Works with all themes
- No performance impact

## Installation

1. Upload the **social-payments** folder to your '/wp-content/plugins/' directory
2. Activate the plugin via the Plugins menu in WordPress
3. A new **Social Payments** menu will appear in WordPress containing clicks and settings
